Logixal is an application software services company specializing in Digital Commerce, eBanking, CRM, Artificial Intelligence, Machine Learning, TensorFlow and Large Language Model (LLM) Domains. We provide omni channel solutions for Retail, Luxury Goods, Financial Services, Media, Publishing, Telecom and Subscription Model based businesses. We are Partners in Excellence with enterprises seeking to enhance and transform their business models. Our focused investments in solution accelerators and evolving technologies help achieve superior business outcomes. The experience and proven capabilities of our talented team of over 100 professionals enables them to exceed customer expectations.

Our customers, spread across the United States, Europe, Middle East, Africa and Asia, are supported from our Offices in India, UK and the USA. In the last 10 years, we have a 100% track record of successfully extending and implementing product software for various enterprises. Logixal is known to deliver superior total cost of ownership (TCO) in Re-platforming / Upgrades as well as Greenfield implementation projects.

Python Architect:

Python Architect will be part of the Digital Commerce Team, responsible for defining the architecture, strategy, and governance of solutions across eCommerce and Digital platforms. This role will lead the team in Analysis, Application Architecture, Design, Integration, Testing, and Implementation of business and technical information technology solutions in using software development life cycle methodology.

Responsibilities:

- Design and architect scalable microservices-based systems using **Python 3.X**
- Define system architecture and technical roadmap
- Architect and deploy cloud-native applications on **Microsoft Azure**
- Define API standards (**REST/gRPC**) and event schemas
- Async Message Processing for streaming & messaging using **Apache Kafka** or equivalent
- Implement event-driven architecture using Apache Kafka
- Design Kafka topics, partitions, replication strategies & consumer groups
- Implement **CI/CD** pipelines and containerized deployments
- Ensure system resiliency, fault tolerance, and high availability
- Lead performance optimization and scalability planning
- Establish security best practices (**OAuth2, JWT, RBAC**)
- Provide technical leadership and mentor engineering teams
- Review designs, conduct architectural governance, and ensure adherence to standards.

Qualification and Experience:

- Minimum 10+ years of software engineering experience, with 6+ years in **Python (3.x)** backend Development.
- Proven experience designing and delivering enterprise-scale AI architectures.
- Hands-on experience in **Microservices Architecture & Distributed Systems**
- Deep expertise in **Apache Kafka** (Producers, Consumers, Streams, Connect)
- Strong experience with **Azure** services such as: **Azure Kubernetes Service** (AKS), **Azure App Services**, **Azure Event Hubs (Kafka-compatible), Azure Storage, Azure DevOps**
- Experience with **FastAPI** development
- Containerization (Docker) and orchestration (Kubernetes)
- Strong database development experience (**PostgreSQL, Cosmos DB, MongoDB**)
- Experience in observability (Prometheus, Grafana, ELK)
- Experience in eCommerce, Digital Commerce, or Digital Banking is highly preferred.
- Bachelor's degree in Computer Science (Master's preferred).
- Excellent verbal and written communication skills.
- Strong ability to influence architectural and business decisions & Customer-centric & outcome-driven mindset.

Location: Mumbai
